

LISP
IN
SUMMER
PROJECTS

Timeline

June 1	signup
June 24	development begins
Sept 30	contest ends
Oct 21	winners announced

Lisp in Summer Projects is a summer programming competition fostering interest in LISP using any LISP-based technology. Common Lisp, Clojure / ClojureScript, Racket, Scheme or any of the hundreds of recognized dialects can be used to create any type of software, API, library or service. Music, art and writing are encouraged.

A \$2000 Grand Prize and many \$500 prizes are awarded, along with tickets and speaking slots for especially great projects at the next:

- International Lisp Conference (Montreal)
- Emerging Technologies for the Enterprise (Philadelphia)
- Clojure West (Portland)
- META - Workshop on Metacomputation (Russia)
- Lambda Jam (Chicago)
- European Common Lisp Meeting (Berlin)
- Clojure Conj (Washington DC)
- European Lisp Symposium (Paris)
- Quasiconf (Germany)
- Racket Con (Boston)
- International Conference on Functional Programming (Sweden)

Judging the competition is an international panel of academic and industrial experts in the fields of artificial intelligence, mathematics, functional programming, LISP and language development.

The planet-wide competition is open to anyone over 18, signup remains open throughout the competition, enter as many times as you like.
