

Lisp in Summer Projects Submission

Submission Date	2013-10-01 22:59:10
Full Name	Cory Koch
Country	United States
Project Name	Prayer Times
Type of software	other
General category	other
LISP dialect	Emacs Lisp
GitHub URL	https://github.com/ckoch786/prayer-times
Did you start this project?	Yes, all the code is written by me
Project Description	I want to upload a free-form 3-4 page PDF composition.
Upload 3-4 page detailed PDF	SummerOfLispProject.pdf

Screen shots

The screenshot shows the Emacs editor window titled "init.el - emacs@localhost.localdomain". The menu bar includes "File", "Edit", "Options", "Buffers", "Tools", "Emacs-Lisp", "Development", and "Help". The toolbar contains icons for "Save", "Undo", "Cut", "Copy", and "Find". The main editing area displays the following code:

```
;;; Prayer Times
(load "~/repos/prayer-times/prayer-times.el")
```

The status bar at the bottom shows the current buffer is "init.el" with 19,0 lines. It also indicates the current date is "October 1, 2013" and lists prayer times: fajr ("6:17"), sunrise ("7:31"), dhuhr ("1:24"), asr ("4:41"), maghrib ("7:16"), and isha ("8:32").
